MEERKAT · YOUR RELATIONSHIP ADVISOR · 2026

Your Relationships, Put to Work.

Meerkat scores your network the moment you connect it, shows you where to focus and helps you reach out in your own voice, inside Claude.

2%
reply to a cold email

15–25%
take a warm introduction

97%
of senior leaders say a relationship has won them business they might otherwise have lost

01 · THE PROBLEM

Relationships win business. Most people never put them to work.

- AI writes more of the outreach every quarter, and reply rates keep falling.
- A LinkedIn connection says nothing about how well you know someone.
- Your CRM holds names and activity, not who knows whom or how well.
- 54% of people who know the right decision-makers can't turn those relationships into business.

Set a goal. Meerkat does the work around it.

- Scores your network: upload your LinkedIn connections, CRM or contact lists, and Meerkat scores how well you know each person.
- Shows you where to focus: ask for new clients, investors or a way into an account, and get a ranked list of people you know, plus people one introduction away.
- Drafts the note: each note names the history you share and lands in your Gmail as a draft, in your voice.
- Follows up: each morning in your own Claude, Meerkat checks for replies, drafts follow-ups and books the calls.

How Meerkat knows two people know each other

WORKED TOGETHER

Same sales team at Salesforce, 2016 to 2019

SAME BOARD

Same nonprofit board, 2018 to now

RECOMMENDED BY NAME

Wrote a recommendation for her in 2021

JOB CHANGES

Moved to Stripe as VP Sales, March 2026

Your answers, such as Know well or Don't know, sharpen the scores.

03 · EXAMPLE

ILLUSTRATIVE

One question, the four people who matter.

TODAY

You scroll through 1,500 LinkedIn connections looking for anyone who might buy. Most are people you met once.

WITH MEERKAT

You ask Meerkat which of your relationships could turn into new clients. It returns Simon Cho at Snowflake (same sales team at Salesforce, 2016 to 2019), Tom Brandt at HubSpot (same nonprofit board, 2018 to now), Priya Shah at Workday, and Jen Alvarez at Stripe, one introduction away through Michael Reed, who managed her at Salesforce. Meerkat drafts notes to Simon and Tom. You review and send.

→ **Four named people and two drafted notes, instead of an afternoon of scrolling.**

A professional services firm, mapped from Meerkat's own records with no data from the firm

3,245
people at the firm today

75,988
alumni still mapped and working

1.67M
people one introduction away

04 · GET STARTED

Up and running in a few minutes.

1

Upload your connections. Add your LinkedIn connections, and your CRM or contact lists if you have them, in the Meerkat app.

2

Connect Meerkat to Claude. Add the Meerkat connector, along with Gmail and your calendar. It takes a few minutes, one time.

3

Tell Meerkat your goal. For example: **"Find me new clients. Start with people I know."**

$149 a seat a month for one person, and less per seat as your team grows. Month to month, cancel anytime.

Team seats: $129 for 2 to 4 people, $109 for 5 to 9, $99 for 10 to 24, custom for 25 or more. The Enterprise add-on adds your company graph at any team size, on annual terms.

Meerkat runs inside Claude and requires a paid Claude plan, billed separately by Anthropic.

Gmail and your calendar connect in your own Claude, not to Meerkat.

What you upload is not added to Meerkat's graph.

Your personal scores stay private, even on a team.

Your next opportunity is already in your network.
